The new smart way of production

www. alleantia.com

Alleantia offers a new Industrial IoT platform that bridges the gaps between machines, sensors, and the broader IT applications and infrastructures. Empowered by Alleantia's XPANGO device integration technology, virtually any new and legacy machinery can instantly feed data into multiple enterprise IT applications and clouds.

Smart Factories

Managing production sites and processes using extended information from machines and systems, integrated across business processes and the extended supply chain, supporting production, maintenance, customer service, through 'near real time' analysis of machine and plant information.

Smart Products

Make machines and equipment Smart and Connected, with their embedded intelligence available to new applications with focused and personalized features, and ready to be integrated within Industry 4.0 system, for more efficient and effective utilization, as market demands.

Smart Services

Leverage machine data and distributed computing power to develop new opportunities and business models, making selected machines and systems information available to specialized service providers supporting new services and business models.

Alleantia software makes available dozens of 'IIoT Apps', starting with 'Digital Twin' IIoT Apps that instantly feed machine information to IT development platforms, IIoT Apps to use machine data embedded and with public applications. Last not least, Alleantia's Ecosystem IIoT Apps to connect many Industry 4.0 applications for PLM, MES, FMS, ERP, CRM, Data Analytics, Predictive Maintenance and others.

Alleantia's solutions, already installed in hundreds of machines and plants in Italy and Worldwide, makes Industry 4.0 open and accessible without technological constraints. Alleantia Partners and Customers experience exclusive end-to-end interoperability advantages, for using industrial information gathered from any equipment, safely and with complete control, ensuring smooth transition towards manufacturing digitization.

IN TWO MINUTES

connect your machines to applications, servers, and cloud
